Backend Skills

C#, ASP.NET Core MVC, ASP.NET MVC, Entity Framework Core, PHP, Laravel, CodeIgniter, Django, REST APIs, SOLID Principles

Frontend Skills

JavaScript, Vue.js, HTML, CSS, Bootstrap, Tailwind CSS, Razor Views, jQuery, Inertia.js

Databases

SQL Server, MySQL, PostgreSQL, database design, complex SQL queries, stored procedures, query optimization, indexing, migrations, performance tuning

Cloud and DevOps

Microsoft Azure, AWS, Amazon S3, Azure DevOps, GitHub Actions, CI/CD pipelines, Docker, IIS, Linux, Ubuntu, CentOS, production deployments

Architecture and Leadership

Software architecture, technical leadership, code reviews, junior developer mentorship, BRD analysis, business requirements gathering, user stories, sprint planning, technical documentation

Enterprise Platforms

SaaS, ERP, healthcare systems, mental health platforms, ecommerce, Magento 2, WordPress, Elasticsearch

Mobile Development

Swift, Objective C, Java, Kotlin, React Native, iOS development, Android development, MVVM

Experience

Senior Full Stack Developer

Isolocity • Toronto, On

02/2023 - Present

- Gather and analyze business requirements from clients, stakeholders, and internal teams, translating them into BRDs, user stories, technical specifications, estimates, and implementation plans.
- Design, develop, and maintain enterprise SaaS applications using Laravel, Filament, JavaScript, Vue.js, MySQL, Azure, and AWS.
- Serve as a technical point of contact for clients, investigating reported issues, explaining technical solutions, communicating progress, and ensuring timely resolution of production and support requests.
- Maintain strong client relationships by understanding operational challenges, recommending technical improvements, and providing ongoing application support.
- Lead and support junior developers through task planning, technical guidance, code reviews, debugging assistance, and knowledge sharing.
- Participate in software architecture discussions, technical decision making, sprint planning, user story estimation, and release planning.
- Design and develop reusable REST APIs consumed by internal systems and client applications.
- Build and maintain CI/CD pipelines using Azure DevOps and GitHub Actions.
- Manage application deployments across development, testing, staging, and production environments.
- Configure and maintain cloud infrastructure using Microsoft Azure, AWS, and Amazon S3.
- Manage S3 buckets, application files, access permissions, backups, and cloud storage integrations.
- Optimize MySQL databases through query analysis, indexing, database structure improvements, and performance monitoring.
- Diagnose and resolve production issues involving application code, databases, servers, integrations, and deployment pipelines.
- Collaborate with quality assurance specialists, business analysts, developers, and clients throughout the complete software development lifecycle.
- Improve application reliability, scalability, security, performance, and maintainability through continuous technical enhancements.

Full Stack Web Developer (Consultant Contract)

UNDP - Syria • Damascus

03/2020 - 05/2023

- Contracted by UNDP to design and develop Fadfada, a mental health support and medical staff management platform, from the initial concept through production deployment.

- Gathered and analyzed functional requirements from project stakeholders, mental health specialists, and operational teams.
- Developed functionality supporting mental health services, user management, medical staff administration, operational workflows, and management reporting.
- Built scheduling and session management features to support online psychiatric consultations and communication between patients and mental health professionals.
- Developed functionality supporting mental health services, patient management, psychiatrist and medical staff administration, operational workflows, and management reporting.
- Diagnosed and resolved production issues affecting application availability, video sessions, database performance, and user access.
- Provided technical support, maintenance, troubleshooting, and continuous platform improvements following the initial launch.
- Developed secure telehealth functionality that enabled psychiatrists and patients to conduct remote video consultation sessions through the platform.
